

Your passion fuels their envy.

We've designed our line of Arcticwear with tons of features — from functional to creature comforts. Check out the icons below and throughout the catalog to identify the features most important to you. We've made it easy to find the perfect look to match your riding style.

- 

- MP3 PLAYER POCKET: ADD A SOUNDTRACK TO THE RIDE WITH A CONVENIENT MP3 PLAYER POCKET WITH TANGLE-FREE NECK CORD SYSTEM. YOUR PLAYLIST WILL END LONG BEFORE YOUR RIDE.
- 

- ZIPPERED VENTS: REGULATE YOUR BODY TEMP BY LETTING WARM AIR OUT INTO THE COLD.
- 

- MAGNETIC CLOSURE: A MAGNETIC FLAP KEEPS SNOW ON THE OUTSIDE WHERE IT BELONGS.
- 

- REFLECTIVE TRIM: HIGHLY VISIBLE REFLECTIVE TRIM MAKES YOU NEARLY IMPOSSIBLE TO MISS AT NIGHT. EVEN THE MAN ON THE MOON KNOWS WHERE YOU ARE.
- 

- WATERPROOF/BREATHABLE: A PROTECTIVE LAYER THAT KEEPS SNOW AND MOISTURE FROM CREEPING THROUGH YOUR ARCTICWEAR AND INTO YOUR LONG UNDERWEAR.
- 

- LINER INCLUDED: OUR PREMIUM JACKETS AND COATS FEATURE THREE IN ONE. THE INCLUDED 100-GRAM ZIP-OUT LINER PROVIDES ADDITIONAL WARMTH OR CAN BE WORN AS A STAND-ALONE JACKET.
- 

- ZIP-OFF SUSPENDERS: ADJUSTABLE. REMOVABLE SUSPENDERS EASILY ZIP OFF TO CONVERT INTO WAIST-HIGH PANTS.
- 

- 100% COTTON: THESE PRODUCTS ARE MADE OF PURE 100% COTTON.

The only thing that matters is you and your Arctic Cat® snowmobile. Flyin' across a frozen lake like a comet on skis, racing against the speed of sound. Careening up the mountainside, playing catch with heaven, and comin' back down to earth with a grin the size of your cajones. Bangin' through ditches and owning every trail you set ski on. That's what riding's all about. Being as hooked to livin' life as a bass is to a shiny lure. And when you're riding, letting everyone know exactly what you stand for: Passion. So throw on some Arcticwear,® supe up your sled and come join us. It's gonna be an awesome ride.

Zip it in and zip it up. Or just zip it up and go. 'Cause any way you wear it, the versatile Flex Liner System is perfect as a liner to make coats or jackets even warmer or worn alone as a light jacket. With four different variations of heat — 100 or 200 grams Thinsulate™ Insulation, Down or Softshell — you can choose your personal level of warmth, comfort and protection from the elements.

Pro Flex jackets and coats already feature 100 grams Thinsulate™ Insulation built directly into the jacket or coat. Add any zip-out liner and adjust to your desired level of warmth.

Shell Flex jackets and coats are not equipped with Thinsulate™ Insulation, but rather are lined with mesh for extra breathability (a feature for you aggressive riders). However, they accept any of the four insulation options, allowing you to customize your heat level.

As a bonus, any Flex Liner can be worn as a stand-alone jacket on those warm spring or fall days, or just around town. But make no mistake: Together with a Pro or Shell Flex coat, you've created a technical inner- and outerwear system that keeps you warm and looking cool.

See the world through gold medal-colored glasses.

You need your eyes to see. That's pretty obvious. What may not be as obvious is which pair of goggles designed by Smith® Optics you need to protect those eyes. For starters, replacement lenses add excellent definition in technical light situations. Use amber or yellow in flat light, smoke in bright sun, and clear for day or night riding.

**Arm yourself against the cold with this handy comfort rating scale, a highly scientific, lab- and field-tested rating system developed by the footwear industry to help advise you on which boots to wear when you step out into that winter land of wonder.

Note: As with any rating system, this is more of a suggestion than a rule and should only be used as a comparison guideline, NOT an actual temperature guide. Variables affecting cold-weather protection include circulation, level of activity, presence of moisture, body temperature, windchill and outerwear.

Stomps out the need for foot warmers.

Sometimes it's what's on the outside that counts.

The gap between seasons is hard enough. So make those in-between seasons more fun. Throw on a warm, lightweight twill or canvas jacket and hit the town, the store or your buddy's house. These cool designs work anywhere you want them to.

FLOAT AVALANCHE AIRBAGS

Excavation time is the biggest contributing factor in avalanche fatalities. Our Float avalanche airbags are designed to minimize excavation time by preventing burial. These are the first airbags that are both affordable and easily reusable.

- Simply pull the T-grip to inflate the 150-liter airbag to stay on top of the snow surface
- Excellent peripheral vision from behind-head inflation
- Does not replace the need for an avalanche beacon, probe, shovel and safety education
- Hydration compatible
- Includes pressurized air cylinder
- Hazardous-shipping charges may apply

BELTS

-Custom fit to match each Arctic Cat sled and specific use
-Better contact with clutch surface and faster acceleration from double cogs
-Increased belt life by running 15° cooler than aftermarket belts
-Reinforced with Aramax® aramid fibers for huge strength and durability
-Increased power transmission and less slip from aramid-fiber rubber compounds

KEVLAR DRIVE BELTS AVAILABLE FOR F, M AND XF MODELS, WHICH:

-Dramatically extend belt life
-Sustain belt length better than steel cords
-Note: Proper break-in period required

PREMIUM ARCTIC CAT "EXTENDED-LIFE" ORIGINAL EQUIPMENT REPLACEMENT BELTS

Don't settle for anything less than a drive belt built specifically for your sled. Proven through extensive lab and field testing, original equipment Arctic Cat replacement belts are precision-engineered for each Arctic Cat snowmobile.

CUSTOM-ENGINEERED FIT

While non-OEM aftermarket belts offer "one construction fits all," Arctic Cat Research & Development "custom-engineers" each genuine Arctic Cat belt to match the specific performance characteristics of your sled. This produces the best combination of strength, durability and responsiveness for lower-horsepower, fan-cooled sleds all the way up to high-horsepower muscled sleds. Each one is built using only the finest materials, incorporating precision manufacturing techniques to meet exacting tolerances.

TOP & BOTTOM COGS

Arctic Cat original equipment belts are double cogged, so more of the belt contacts the clutch surfaces. This results in faster acceleration, maximum efficiency, and superb overall performance. Double-cog design provides a larger surface area for greater cooling and longer life. In fact, this belt runs up to 15° cooler than flat-top aftermarket belts.

ARAMAX HIGH-MODULUS (LOW-STRETCH) ARAMID-FIBER TENSILE MEMBER

The Aramax inner cord provides incredible strength and durability for high-horsepower, high-performance sleds. In addition, each belt is reinforced with top-grade, high-flexibility, shock-resistant Aramax aramid-fiber cords, and chemically treated for maximum power transmission and length stability.

HIGH-PERFORMANCE PREMIUM COMPOUNDS

Arctic Cat's OEM belts incorporate advanced "premium" compound materials that ensure optimum belt performance under all riding conditions. The advanced aramid-fiber-loaded rubber compound resists wear and delivers consistent power while minimizing slippage over a broad range of operating temperatures. The thicker, highly flexible design increases grip to clutch surfaces for increased power transmission.

ARCTIC CAT KEVLAR DRIVE BELTS

These ultimate-performance Arctic Cat Kevlar drive belts are custom-engineered for F, M and XF models. Extended-life belts feature top and bottom molded cog construction and high-performance compounds. Inside, the Kevlar cord provides increased belt life and sustains belt length better than steel cords. Please note that proper belt "break-in" is required.

STUD PLACEMENT

- DO NOT use studs that are longer than recommended
- DO NOT place studs in line with the heat exchanger or tunnel protector strip, and factor in the amount of suspension travel to avoid tunnel damage
- Studs MUST NOT extend more than 3/8 in. beyond the rubber track lugs
- Verify adequate clearance between the track, tunnel and heat exchanger to avoid serious damage
- Confirm that your machine has adequate tunnel protection before installing studs
- Use only Arctic Cat-approved Stud Templates shown on page 129
- The length of carbide and number of studs must coordinate to result in balanced handling and proper control

CAUTION

- To protect the tunnel from possible damage from the studs, it is recommended that a Tunnel Protector Kit be installed on those models not so equipped
- A Short Snowflap is required when installing studs on '07-'09 F Series; '09 Z1, Z1 Turbo; '09-'11 Crossfire and CFR

MAXIMIZE HANDLING AND CONTROL

STEERING CONTROL

The length of the turning carbide (carbide inserted directly under the steering spindle) is the determining factor on steering control. The longer the turning carbide, the more positive turning becomes. Too few studs with long turning carbides can result in the situation shown in Illustration 1 below.

TRACTION CONTROL

The quantity and types of studs inserted through the track can have several effects. If installed improperly, track and/or stud damage can result. If the pushing force from an excessive number of studs exceeds the ability of the steering to control the force, the effect could be like that in Illustration 2. In this case, the studs tend to "push" the skis in a straight line.

1. BACK END LOOSE. TOO MUCH CARBIDE, NOT ENOUGH STEERING CONTROL.
2. FRONT END PUSHES. WEAK STEERING FROM WORN WEARBARS, TURNING CARBIDES TOO SHORT OR OVERSTUDDING ON TRACK.
3. STEERING CONTROL AND STUD QUANTITY ARE IN BALANCE FOR PROPER SETUP.

TUNE YOUR SLED'S HANDLING TO YOUR RIDING STYLE

Determining the proper traction and control is simple. What's your riding style: are you a conservative trail rider or a performance trail rider? Look at the chart below. Find the line with the horsepower of your sled. Look under your riding category. Here you will discover the number of studs and the length of the carbide wearbar you should use. This is a baseline guide for stud and wearbar selection. See your dealer for specific model applications.

SLED	STUD QUANTITY/ INCHES OF TURNING CARBIDE		PERFORMANCE
	TRAIL		
50-75 HP	48/4 in.		48/6 in.
75-125 HP	102/6 in.		153/8 in.
125-150 HP	153/8 in.		153/10 in.
150-170 HP	153/8 in.		153/10 in.

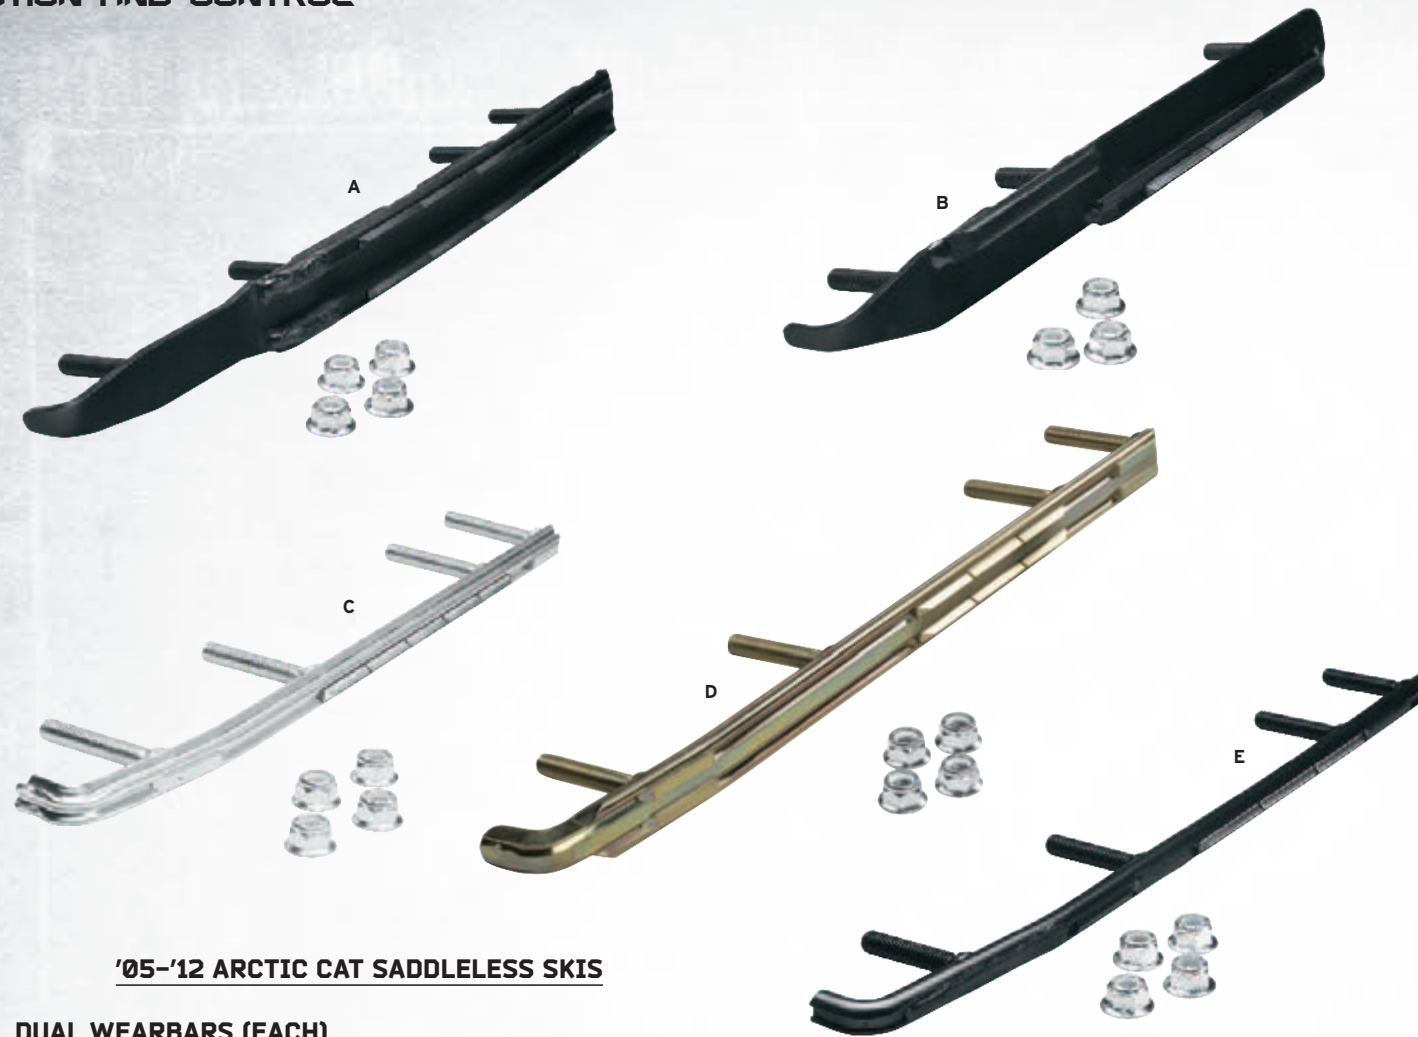

FOR STUD PLACEMENT, USE ONLY ARCTIC CAT-APPROVED STUD TEMPLATES SHOWN ON PAGE 129.

Arctic Cat traction products are available in package quantities of 102 and 153. These quantities will give you the best combinations for both 121-in. and 128-in. tracks.

TRACK LUG HEIGHT	Recommended Stud Length (in.) WOODY'S STUD LENGTH		STUD BOY STUD LENGTH
	1.075	1.325

WOODY'S® LIMITED WARRANTY

International Engineering & Manufacturing, Inc. warrants each product manufactured by it to be free from defects in material and workmanship under use for the purpose for which it is intended. The Company shall not be liable for damage or delays caused by defective materials or workmanship; is limited to the repair or replacement at its factory of defective article or part thereof, which may be returned to the factory, transportation charges, prepaid within one (1) year after delivery to the original purchaser. Proof of purchase is also required. The Company shall be the sole judge of the existence of any defect in the article so returned. No claims for charges incurred in the removal, disassembly or reinstallation of such article shall be allowed. Product manufactured for consumer use on snowmobiles is designed for snow or ice only; use on any other surface voids warranty.

This Warranty shall not cover any article which has been misused or neglected or damaged by accident or any article which has been altered outside the Company's factory. The Warranty for studs is void unless the studs are installed with Woody's installation tools, support plates and lock nuts; according to the recommendations set forth in Woody's Instructions and Template Patterns. This Warranty does not cover bending, chipping, flaking or carbide pin breakage or pin loss from stud wear, stud replacement labor or shipping.

The Company shall, in no event, be liable for consequential damage or contingent liability arising out of any total or partial failure to function of any article manufactured by it or of any equipment on or in which it is used. Failure of a user to give notice to claim as to defect claimed under the provisions of the Warranty within one (1) year after delivery to original use, such claim shall constitute a waiver by consumer of all claims with respect to goods and equipment.

No express, implied, or statutory warranty other than that herein set forth is made or authorized to be made by the Company. All returned warranties will not be accepted without a return authorization number.

WOODY'S MANUFACTURER WARRANTY RETURNS

Call our customer service department for a Return Authorization Number. This number must be visible on the outside of the box. The product must be inspected by a Woody's technician to determine if the product is defective due to material, quality or workmanship before a final warranty determination is made. Proof of purchase is required. All returns to the manufacturer are for exchange only.

2-Cycle Oils

APV Synthetic is the best 2-cycle oil you can get for your Arctic Cat!

We spend thousands of hours testing 2-cycle oils only in Arctic Cat engines. We dyno test many formulations, and eventually we narrow the best-performing candidates down and expose them to the final test — our field test drivers. Ultimately, one unique formulation emerges. This is proven to be the best oil for all your Arctic Cat snowmobiles.

ARCTIC CAT APV SYNTHETIC OIL

Our APV™ Synthetic Oil stands alone as the best, most performance-oriented lubrication you could possibly put through your sled. Given your commitment to the highest level of riding possible, the best oil for the dollar guarantees flawless engine operation.

- The ultimate in performance oil for Arctic Power Valve™ engines and all Arctic Cat 2-cycle engines
- Protects against engine wear with excellent lubricity
- Increases efficiency and maintains Arctic Power Valve cleanliness
- Smokeless formulation burns extremely clean with a fresher scent
- Prevents piston scuffing, varnish formation and deposit buildup
- Improved cold-weather startup with prime lubrication

4-Cycle Oils

Arctic Cat Synthetic 0W-40 engine oil is the ONLY oil that's been designed specifically for Arctic Cat 4-cycle snowmobiles. It is the ONLY oil that has been exhaustively field-tested in ALL Arctic Cat 4-cycle snowmobiles and ultimately secured engineering approval. This custom synthetic formulation allows your engine to deliver optimum performance and protects it in all operating conditions, including turbocharged models with extreme horsepower output.

SYNTHETIC 0W-40 OIL

- Provides superior performance in ALL operating conditions
- Synthetic base stocks offer high lubricity that protects engine from wear and scuffing
- Premium additive package helps prevent deposit formations, ring sticking and plug fouling while providing oxidation stability
- For use in ALL Arctic Cat 4-cycle snowmobiles
