Read the Side-by-Side vehicle (SSV) and All Terrain Vehicle (ATV) Operator's Guide and watch the Safety DVD before driving. For your safety, wear a helmet, eye protection and other protective gear. In your SSV, fasten lateral net and seat belt at all times. Operator must be at least 16 years old. Users should, however, respect any applicable law establishing a higher minimum age for riding an ATV or SSV. BRP urges you to "TREAD LIGHTLY" on public and private lands. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when you ride. Always ride responsibly and safely. BRP highly recommends that all ATV and SSV drivers take a training course. For safety and training information, see your authorized Can-Am dealer or, in the U.S.A., call the ATV Safety Institute at 1-800-887-2887. In Canada, call the Canadian Safety Council at 1-613-739-1535 ext. 227. ATVs and SSVs can be hazardous to operate. Always remember that riding and alcohol/drugs don't mix. SSVs and ATVs are for off-road use only. Never ride on paved surfaces or public roads. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Racing scenes in this brochure were photographed during an organized race involving highly skilled operators under controlled conditions. Do not attempt. Can-Am Outlander MAX ATVs: these ATVs are recommended for drivers aged 16 and older, and passengers aged 12 and older only. Make sure that all laws, regulations, and BRP's warnings/recommendations for ATV and SSV passengers are respected. Never carry passengers on any ATV not specifically designed for such use. Never carry a passenger under the age of 12. A passenger must be able to hold handgrips and to comfortably place both feet flat on the floorboard while seated upright. BRP reserves the right, at any time, to discontinue or change specifications, prices, designs, features, models or equipment without incurring obligation. Some models depicted herein may

# TECHNICAL WEAR

## WE KEEP YOU DRY. WE KEEP YOU WARM.

Base layers are recommended by experts and pros to keep you dry, warm and comfortable, while managing your temperature balance. Find out the base layer adapted to your riding style and the degree of insulation and moisture management you need. **Your ride will become even better.**

### Which layer should you wear?

➤ You are an intense and active type of rider and you tend to sweat a lot? Choose the:

#### ACTIVE BASE LAYER

##### KEY BENEFITS

- Never feel too cold or too hot with the X-Static<sup>+</sup> fiber
- Stay dry even on intense rides
- Large mesh areas keep your thermal balance
- Your layer remains permanently odor-free, antibacterial and antistatic

➤ You are currently layering with casual wear that absorbs humidity and gets damp at the end of the day. Benefit from a lightweight stay dry layer... Choose the:

#### ULTRALIGHT BASE LAYER + ULTRALIGHT SOCKS

##### KEY BENEFITS

- Stay dry with the Coconut fiber
- Your layer remains odor-free
- Mesh areas keep your thermal balance

➤ Are you the one who's always a little cold? Get special protection to maximize your body heat... Choose the:

#### THERMAL BASE LAYER + THERMAL SOCKS + ULTRALIGHT BASE LAYER + ULTRALIGHT SOCKS

##### KEY BENEFITS

- Push the moisture away by wearing the Ultralight Base Layer underneath
- Insulate your body and get optimal warmth with the Thermal Base Layer
- Get the best comfort

#### MID LAYER & OUTER LAYER

Depending on the outside temperature and your activity level, make sure you preserve the right body heat and perspiration by adding a:

- Jersey ➤ Fleece ➤ Vest ➤ Riding Jacket or Winter Jacket
- Riding Pants or Winter Pants

## RIDING GEAR

### ACTIVE BASE LAYER

Thoroughly X-Static<sup>®</sup> enhanced through to the fiber to thermodynamically regulate your temperature by conducting body heat out in warm weather and reflecting body heat back to the skin in cold weather. Permanently treated for long-lasting antibacterial performance undiminished even after 250+ washes. Silver woven into fiber immediately binds with odor-causing agents such as ammonia and denatured proteins to instantly reduce odor. Extra panels in specific areas for better ventilation and accelerated drying. Compressed for added comfort. Content: 92% Polyester, 6% Spandex, 2% X-Static.

# TECHNICAL TERMINOLOGY

## WE KEEP YOU DRY

Respirative Performance Matrix or RPM coating exclusive to BRP Riding Gear. Delivers extremely high performance and durability for perfect climate control under even the most extreme conditions. Trademark waterproofness, windproofness and breathability required of BRP Riding Gear shell fabric developed for intensive use and demanding riders.

Same great RPM coating PLUS total seam and logo sealing. Also, added direct venting in strategic jacket areas for more efficient moisture management during intense activity.

### TEFLON\*

Teflon provides an invisible barrier around fabric fibers to repel water and stains. In addition to retaining its water shedding properties longer than standard Teflon, Teflon HT and HP are also even more resistant to soiling and staining without altering the fabric's color, appearance, structure, texture and breathability. Teflon HT, good up to 20 washes and Teflon HP up to 30 washes compared to manufactured coatings washable only 1 to 5 times.

### HIPORA\*

Windproof, breathable and waterproof membrane that features unique polyurethane coating technology and delivers excellent moisture management.

### DWR\*

DWR stands for Durable Water Repellency. This treatment helps prevent the outer fabric surface from absorbing water, keeping the outerwear both light and comfortable.

### SEAM SEALING

Seams and embroidery can act as tiny entry points through which wind and water can infiltrate. That's why jackets and pants with RPM are critical seam and logo sealed. And Riding Gear with RPM Max are 100% seam and logo sealed for an even more comprehensive barrier from all the elements. The proprietary tape is also waterproof and breathable to fully seal the deal for complete performance.

## WE KEEP YOU WARM

### CRESTA BY PRIMALOFT

Primaloft Cresta offers warmth without weight and extra bulk. It is designed to keep you warm and comfortable throughout the day.

### PRIMALOFT ONE

Warmer wet or dry than any other synthetic insulation. The ultimate down-like microfiber insulation. Quick drying, soft and breathable. Primaloft One is lightweight, compressible and thermally efficient.

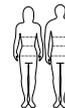

# SIZING CHART

## RIDING GEAR

## HOW TO MEASURE

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

Chest/Bust	Waist	Gloves	Inseam	Arm length	Head
Measure under your arms, around the fullest part of your chest.	Measure around your natural waistline, keeping one finger between the tape and body.	Measure palm width.	Without shoes, from crotch to the floor.	Hand on hip, from center back neck bone, along shoulder point around elbow to bottom of wrist bone.	Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

**> BRP offers the best year-round track system on the market - the Apache 360**

**APACHE 360 TRACK SYSTEM**

PARTS & ACCESSORIES

- >** The Apache 360 Track System offers the biggest contact patch, highest ground clearance and lowest steering effort.
- >** With its heightened rubber over molded wheels, ice build up, friction and vibration are reduced to a minimum.
- >** Track design provides ultimate traction in any terrain.
- >** The conversion from tires to tracks can be made in less than 20 minutes using the Apache 360 Mounting Kit. There is no excuse not to get out and ride.
- >** The DPS Module, optimizes your Dynamic Power Steering (DPS) performance, maximizing steering agility at lower speeds while providing firmer steering at cruising speeds. In addition, it provides a speed correction factor for the speedometer so that your speedometer indicates the proper speed when running with your tracks installed.

**APACHE 360 TRACK SYSTEM**

Best year-round system on the market, even better than the leading Apache WT. Biggest contact patch, highest ground clearance and lowest steering effort. Quick conversion from tires to tracks in less than 20 minutes for fastest switch. Reduced friction and vibration with heightened rubber over mold wheels. Track design and rubber for more traction in snow or any other type of ground surface. Apache 360 Mounting kit required, sold separately.

### ALPINE FLEX PLOWS 54" (137 CM) & 60" (152 CM)

Plows made of flexible UHMW, the highest impact strength of any thermoplastic presently made. Enormous flex action protects the driver, unit and object accidentally impacted. Impact absorption properties return plow to its original shape. Rearward release action practically eliminates jolts from being transferred to the driver or unit. Attaches and detaches effortlessly thanks to a fast and easy mounting system. Groundbreaking reinvented blade turning mechanism mounted as high as possible to eliminate having to bend down to change or adjust blade's angle. High pivot point keeps plow on pavement. Compatible with all Alpine Flex Plow accessories to further enhance plow versatility.

#### 54" (137 cm)

Clears 50" (127 cm) when angled. Ideal for clearing narrower areas, like sidewalks.

# XPS MAINTENANCE PRODUCTS

**XPS OFF-ROAD VEHICLE HPG-T/A GAS SHOCK OIL**

Recommended for all top quality gas shocks for off-road vehicles including our own Can-Am HPG-T/A nitrogen gas charged shocks. High viscosity index for extreme temperatures encountered in off-road vehicle conditions.

293600136 | **\$91.99**

**XPS SYNTHETIC GEAR OIL**

Brings forward the latest innovations of lubricant technology. Provides optimal protection under severe conditions while allowing durability that far exceeds other synthetic and conventional API GL-5 gear oils. Offers added assurance during extended drain intervals. Allows higher load capacity when compared to petroleum lubricants. Its tremendous thermal stability and relatively constant viscosity give exceptional wear protection and superior performance at extreme temperatures. Strongly recommended for use in all Can-Am off-road vehicles requiring API GL-5 gear oil.
